For the purposes of today's lecture, we are looking at some of the indicators in natal charts regarding cash flow, debt, spending, self worth value. We are also looking at what happens when those house cusps are progressed, when their rulers are triggered by major transits, or, even an eclipse. What does this mean? How can you bring this information to the table for your client to have better understanding?

I. General View.

- a. Hierarchy of Needs – very old concept, a different view. (See PDF)
 1. Fourth house – family perceptions.
 2. Tenth house – Public expectations.
- b. Contemporary: Needs versus Wants. New Models.
- c. What is the person's age?

II. Look at their second and eighth and where the houses progress over time.

III. Values: Condition of one's value for self. Second House and Venus. One's ability to see the appreciation of others for them.

- a. Ruler of the second changes signs over the years. If not in the progressed chart, then in the solar arc chart.
- b. As that changes so does the 'value system' of the individual.
- c. The house itself will change over time as well – meaning that it will have another ruler for a time and then one must view the capacity of that ruler and its aspects.

IV. Others-their value of you. Condition of one's Eighth House, or, the issue of trust – ability to attract to them that which they need for support. Condition of eighth house ruler. Robert Jansky stated that this was the house indicating 'income' – what one does - .

- a. Ruler of the eighth changes signs over the years. If not in the progressed chart, then in the solar arc.
- b. As that changes so does the view that others have of them. That ruler will influence their 'ability' to attract to them what they need or want.
- c. The house itself will change over time as well – meaning that it will have another ruler for a time and then one must view the capacity of that ruler and its aspects.

V. Saturn: Perception of one's reality or their limitations.

- a. What is their "Fear" quotient? (See PDF).
- b. Put Saturn on their Ascendant.

VI. Spending habits.

- a. Jupiter squares or transits?
- b. Reasonable and Unreasonable Requests (What is your fear factor?)
- c. Capacity to budget or maneuver.
- d. Angular, Cardinal? Fixed, succedent? Mutable, Cadent?

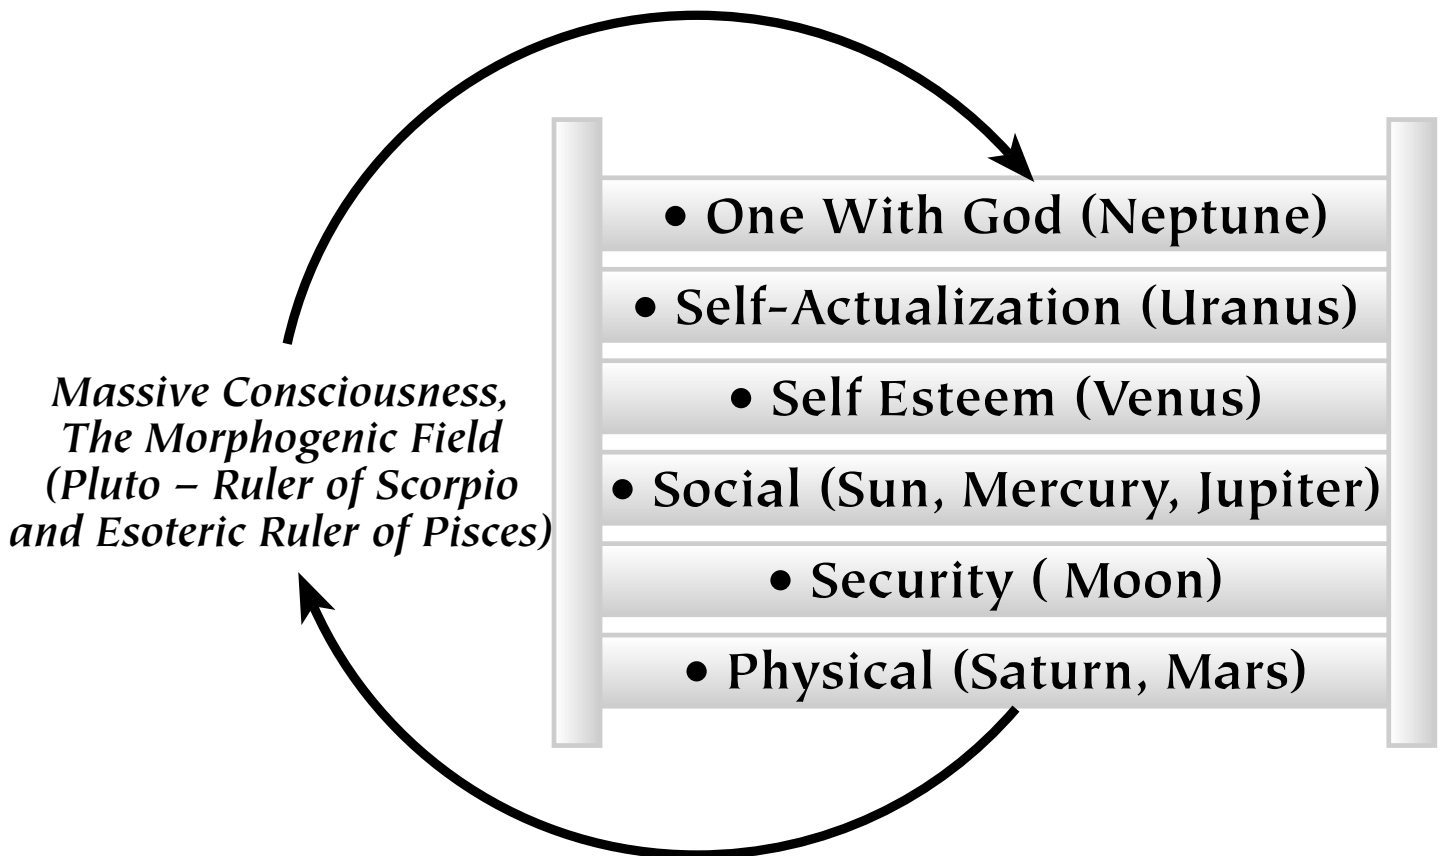

VII. Moments of opportunity.

- a. Progressed lunation cycle.
- b. Uranus transits.
- c. Eclipse hits favorable to nativity.
- d. The moment where one's vision meets the Creator's vision. Michelangelo – Sistine Chapel.
- e. Your thoughts??

(See PDF for charts in this lecture).
